

COMMENTS ON ISOO DRAFT OF EXECUTIVE ORDER

1. Page 2, Section 1-103

Delete "by an original classification authority." This is an unnecessary requirement for an original classification authority.

2. Page 6, Section 1-301

Add "matter whose disclosure might place the life or safety of an individual in jeopardy" to the list of information to be considered for classification.

3. Page 8, Section 1-303

Add "cryptologic information, information which could compromise the identity of a confidential source and information relating to intelligence activities (including special activities)."

4. Page 9, Section 1-501

The parenthetical expression in (a) and (b) must appear in the main paragraph of 1-501 in order to cover all markings.

5. Page 17, Section 3-491(b)

Add "document or material containing the "in front of information. This increases the requirement for specificity by requesters under mandatory review. (The definition for "information in Section 6-102 does not serve the same purpose).

6. Page 20, Section 4-101

Add "Agency heads designated pursuant to Section 1-2 shall issue and maintain minimum investigative standards that must be satisfied before access to classified information is permitted."

7. Page 21, Section 4-201

Add after the Director of Central Intelligence "who shall ensure the establishment of common security, access, dissemination and control standards for such programs."

8. Page 25, Section 5-202(g)

Drop entire section. This would levy a reporting requirement on Agencies without the normally required interagency coordination and approval by GSA/NARS and OMB.

9. Page 28, Section 5-404

Change "promptly notified" to "informed." This is the wording in the current executive order.
